**Examiner's Detailed Action**

1. **Claims 1, and 3-17 are allowed.**

**Examiner's Amendment**

**In the Claims:**

2. Claim 1 has been amended as shown below to incorporate the limitations of claim 2.

This amendment was authorized by Mr. McDowell in a telephone conference held on September 22, 2004.

1. (Amended) Process for the automatic identification of a document in a computer, comprising the steps of: creating a document in a text editor of a computer; analyzing the data contained in the document according to at least one of a content of the data and their a position of the data in the document; comparing the data one by one to one or more identification criteria of documents, an identification criterion being defined by at least one of the content and the position of a datum characteristic of a document; and copying the document into a memory of the computer according to the identification criterion, without user interaction wherein, when the comparison is negative, a parametric window is opened to define at least one new

identification criterion associated with this document, said new criterion being memorized to identify thereafter any document having this datum.

3. Claim 2 has been canceled.

#### Reason(s) for allowance

4. The following is the Examiner's statement for the reasons for allowance:

The closest prior art *Mahoney et al.* (USPN 5,889,886) does not teach or render obvious applicant's claimed invention. Specifically, applicant employs a non-OCR-based (Optical Character Recognition) methodology. According, the primary reason(s) for allowance is the subject matter of original claim 2 in combination with claim 1 is not shown by the prior art. In particular a negative comparison causing a parameter window to open and a new criterion being memorized is not shown in the art.
